Benchmark Fitting Guide for Men

A. Neck
The measurement is taken around the neck, at the collar level.

B. Chest
The measurement is taken around the fullest part of the upper chest, keeping the tape under the arms and around the shoulder blades.

C. Waist
The measurement is taken around the waist, keeping one finger between the tape and the body, for a comfortable fit.

D. Inseam
Measure from the top of the inner pant leg seam (the crotch) to the opening at the bottom of the pant leg.

E. Sleeve
Measure the length from the top stitching on the shoulder to the bottom of the wrist. Be careful not to measure too high above the wrist.

WORK WEAR

AUSTRALIAN INDUSTRIAL WEAR™

SAFETY IS OUR NUMBER ONE PRIORITY!

• AS/NZS 4602.1:2011
These AIW garments are designed to meet AS/NZS 4602.1:2011 for day and night visibility. This standard requires at least 0.2m2 of high visibility fabric (AS/NZS 1906.4:2010) on the front and on the back to meet the day and/ or day/ night standard. Garments designed to AS/NZS 4602.1:2011 for Day/ Night or Night Standard have a compliant retroreflective taping configuration.

• AS/NZS 1906.4:2010
We use High Visibility materials which are tested to Australian Standard 1906.4:2010 which outlines the requirements for fluorescent capabilities and the chromaticity reading to ensure that bright colours are within the required colour range.

• AS 2001.2.18-1987
Some of AIW garments have water-repellent or water-resistant coating which stops moisture from reaching the wearer in wet-weather conditions.

AIW has become a preferred brand within the tough workwear industry, offering top quality, great value, reliable stock, and great customer service. All AIW products are manufactured from laboratory tested fabrics and treatments that conforms with AUS/NZ Standards. This is to ensure that the comfort and wear of AIW products are of the highest standard, and are suitable for the harshest working environment.

AIW quality workwear is available in "traditional" and "modern" styles that deliver comfort and protection at affordable prices. All AIW workwear is designed to provide comfort and durability for active working people and their "real" needs. AIW workwear also offers tear and abrasion resistance fabrics with re-enforced pockets and stitching to provide the most durable workwear suitable for any challenge. Where required, all AIW garments have been certified to meet the relevant AS/NZS standards.

• AS/NZS 2622:1996
AIW workwear garments meet the requirements of AS/NZS 2622:1996 which outlines the Australian Standard for labelling of fibre content in textile products.

• AS/NZS 4399:1996
AIW workwear garments provide protection against ultraviolet radiation transmitted from the sun. The sun protection rating shown is rated at: good protection (UPF 15, 20), very good protection (25, 30, 35) or excellent protection (40, 45, 50, 50+).

• AS/NZS 1020:1995
AIW products reduce the amount of static electricity your body conducts by offering a large range of natural cotton fibre products. Our 100% cotton wokwear naturally avoids the generation of static electricity.
